

## Digital Photo Imaging

### Pho 127

*"To photograph truthfully and effectively is to see beneath the surfaces and record the qualities of nature and humanity which live or are latent in all things."*

*-Ansel Adams*

### Digital Discussions

Periodically in this class we will break into small groups to share resources, information and opinions about topics that are relevant to digital imaging. The groups will change and so will the theme of the discussions. You will be asked to write a paragraph or two about a particular topic and post it online in the **Discussions** section of our class Blackboard site.

### Topic 2: Find a Great Tutorial

There is an abundance of useful tutorial sites on the web. Find a tutorial that you like and try it out. Try to find one that is useful to you.

Add your contribution as a Thread under the Digital Discussion 2 link here on Blackboard.

Put the name of the tutorial in the Subject field of your entry. Be sure to add a link to the site in your entry as well.

Write a description of the tutorial and a brief review of the site on which it was found. Tell us why you picked it, whether it was helpful and whether it was well done or not. Tell us about the site where you found the tutorial. Is it from a company or an individual? Are there other useful things at the site?

We will meet in small groups to discuss what you've discovered.
