

## Digital Photo Imaging Pho 127

*“Photography is a medium to capture memories, when memory grows into sublime, photography becomes art.” – Kamir*

### Final Portfolio

1. Create a web gallery of all five of your assignments and at least five other photos you'd like to share. You can create it in Lightroom, Photoshop or any other program that lets you create a gallery.

2. Create a video portfolio of your five assignments and at least five other of your best images in iMovie with text, transitions and music. The video needs to be exported from iMovie as a .mov video

Save your work to your hard drive. Burn the web gallery and the video to a CD-ROM to turn in. You won't get it back

3. Pick your favorite work from one of the assignments and make 3 matted or mounted prints. The print should be 8" X 10".

We will look at the web galleries, videos and the prints on the last day of class,

Have fun.
